Dialecticæ Candidatis

Felicius ingenio studentium veritas ipsa est: hanc ergo in scopum intendamus, Auditores, si ingenio velimus esse feliciores. Felix profecto ingenii labor, qui totus in veritate ponderanda, et assequenda veritate incumbit. Nihil hoc labore pulchrius, sed nihil pariter molestius. Hinc facile dijectari licet, cur tanta opera laboreque tot multi, et famosi viri ob pononderas scientias, earumque veritates perquirendas tam longo temporis intervallo, et nulla fere intermissione desudarint. Res enim pulchra, sed difficilis difficilior: et magno tamen in pretio est: quid ergo? præluceat iis oculus mentis Dialectica nempe, quæ non emendicata; sed propria lucet inter implicatissimos scientiarum labirintos sine errore in fastigium, et scientiæ cuiusvis veritatem nos adducat ergo apite, et huic oculo mentis mente, et animo assignentur.

De proemialibus Dialecticae

D. 1a.

De natura Logicae eiusque proprietatibus

C. 1.

Logica Definitiva, ac Divisiva.

Ut clarius, et expeditius circa Dialecticae proprietates considerandas procedamus, operae pretium erit in ea quasi fronte ipsam logicae definitionem praemittere. placet nobis logicae definitio, quae [illegible] quidem ingeniosior, et [illegible]: scientia directiva intellectus ad disserendum. per esse scientiam directivam convenit logica cum aliis artibus, ut medicina; per reliqua definitionis differt ab omni non ipsa; nulla siquidem scientia, praeter logicam [illegible] directiva sit potest dirigere ad disserendum. nota, aliqui utuntur in genere in definitione logicae aliqua ex his vocibus: facultas, ars, scientia: sed non bene: quia per nullam ex vocibus enumeratis exprimitur genus proximum.

2. dices. subsistit [illegible] quod logica sit scientia: ergo semper [illegible] definitur per esse scientiam directivam: ratio est, quia iuxta [illegible] definitiones bene fiunt per principia [illegible]. concesso antecedenti, nego consequentiam [illegible] illud siquidem [illegible] solum quando [illegible] definitio explicat aliquid praeter scientiam [illegible]; at quando aliud non potest explicari [illegible] est sola scientia [illegible] per principia [illegible] tunc [illegible] per principia.

iacet ad definitionem, et dividendum, et argumentandum; dicimus neque ipsum idem est, ac definiri, divisione, et argumentatione, ut recte prae cipue, et maxime omnis philosophica bene discendo significatio ut notant patres Conimbricenses, q. 1. proemialis art. [illegible] lo [illegible] audiendum non est [illegible] quidam ingeniosiores, qui logicae de finitionem existimant ac hoc bene dicendo non explanari; sed po tius obnubilari.

4. non addimus in definitione recte ad disserendum sicut quidam ab aliis additoribus, ut logicam inter, et Rhetoricam manifestum discrimen. non tamen additamento non est opus; quia licet Rhetorica non tantum, ut adversarii aiunt, intendat ornatum, concinnitatemque, et orationis pulchritudinem; sed etiam verum sibi facere, et animos audientium movere conatur; id tamen illa facit quia veras definitiones, divisiones, et argumentationes ipsa Rhetorica elaborat; nam definitio &c, quae est ficta non est absolute definitio, nec divisio &c; sicut homo, qui est pictus non est homo, non est absolute homo: unde per hanc additionem absolute propriae, ut ponitur in nostra definitione, logica a Rhetorica satis dignoscitur discrimine. propter eandem rationem abstinemus a voce illa recte, et aliis similibus, quas alii in logicae definitione prodigunt.

5. dividitur logica in naturalem, et artificialem. naturalis est, ut communiter docetur, vis ipsa intellectus, qua sine extrinseco iuvamine potest intellectus aliquam parere, et aliquam de sumpsit in discursatione. artificialis est, ut etiam communiter docetur illa collectio regularum, quas intellectus quasi ab extrinseco accipit, et quarum iuvamine [illegible] admodum tenendi principia. notant patres Conimb. q. 1. a. 2. et [illegible] f. 2. [illegible] logicam naturalem [illegible] [illegible] logice [illegible] logica natura

[illegible] ex parte operationis quivis [illegible] sine natura [illegible] artificialis: [illegible] igitur hic explicatio, sed [illegible] praeferenda est.

6. Dividitur 2o in actualem et habitualem. Actualis sunt regulae, quibus intellectus dirigitur ad discurrendum. Habitualis est habitus qualitas ex repetitione actuum logicalium in intellectu generata, inclinans intellectum [illegible] et promptum ad discurrendum. = Dividitur 3o in analyticam, topicam et sophisticam. [illegible] modum inferendi conclusionem evidentem ex praemissis evidentibus. [illegible] modum inferendi conclusionem probabilem ex praemissis probabilibus. 3a [illegible] ad fallaciam [illegible] argumentationes [illegible] intellectum [illegible] [illegible] [illegible] logicae divisionem [illegible] omnis [illegible] logicae, scilicet logicae argumentativae.

7. Dividitur 4o in docentem et utentem. Ad divisionis [illegible] explicandam [illegible] in [illegible] voce [illegible] [illegible] [illegible] quod logica docens sint regulae, quibus intellectus dirigitur [illegible] modum sciendi [illegible]; ut sunt regulae [illegible] definitio sit clarior definito; divisio adaequata sit; argumentatio [illegible] [illegible] [illegible] [illegible] quod [illegible] logica utens [illegible] [illegible] [illegible] definitioni, divisioni, aut argumentationi [illegible]: ut [illegible] [illegible]: homo est animal rationale; [illegible] [illegible] [illegible] est animal; [illegible] est [illegible]: ergo est [illegible].

8. [illegible] ergo [illegible], an [illegible] divisioni [illegible] ex resolutione [illegible] difficultatem, in quantum [illegible] [illegible] [illegible] [illegible] modi sciendi [illegible] [illegible] [illegible] [illegible] propriae logicae [illegible] logicae utentis [illegible] [illegible] [illegible] [illegible] [illegible], [illegible], et [illegible]

9. Ratio

~~a de logica in scientia non propria definitione per esse scientias directi~~ va dicere: modi sciendi in sua scientia propria logicae dicuntur tantum logica utens: hoc ita facile suadetur: nam in ipsa modi sciendi in materia logicae sunt sua propria logica; scientiae autem propria sunt ea quibus: ergo sunt propria logica utens. antecedens probatur: nam desio divisionis, nec non propria logica; docens singulos modos dividendi: iterum utitur logica definitiva; quia desio divisionis est tractatio juxta directionem regularum, quas recta desione tradidit.

10. opp. tamen.

unus distinguitur a doctrina; sed modus sciendi in materia logicae saltem est unus: ergo est doctrina: et consequenter non propria logica. aliter ergo dicitur eadem sic potest probari: usus distinguitur a doctrina; sed modus sciendi in materia logicae saltem est doctrina: ergo non est usus, et consequenter nec logica utens. distinguo maiorem: usus distinguitur a doctrina, cuius est usus, concedo: usus distinguitur a doctrina, cuius non est usus, nego maiorem: et negata minori, non liquet similiter argumentandum alteri sic, ergo etiamsi.

11. Ratio itaque sciendi in materia logicae simul est usus et doctrina; et neque est usus, cuius est doctrina, neque est doctrina, cuius est usus. omnia liquent ex desione divisionis: nam neque desio est usus logicae definitionis, et simul doctrina logicae divisionis: ergo quodlibet actus potest esse usus simul distinctus respectu logicae docentis, et utentis. immo etiam dici potest, quod sit actus sciendi logicae quatenus potest esse usus simul, et doctrina: ut desio divisionis est usus, et doctrina est, in qua, usus alterius, aut alterius logicae.

definitivae; et est integra doctrina, sive regula praescribens modum defini
endi: in quo non bene exponitur, quod sit unus, cum sit nomen totius
doctrinae, et quod sit doctrina, cum sit unus.

12. Obiicies: actus, qui
formam sciendi habet, et formam modi sciendi praescribit nec est logica docens,
nec logica utens: ergo modus sciendi in materia logicae tractus non est proprie
logica utens. 2a pars antecedentis probatur: quia eiusmodi actus est
effectus logicae docentis: ergo requirit esse logica docens: 2a autem sic, quia ac
tus eiusmodi est unus regulans logicae: ergo requirit esse logica utens, sed
unitata. — nego antecedens: ad probationem primae partis, concesso antecedenti, distinguo
consequens: ergo requirit esse eadem logica docens, cuius est effectus, concedo; requi
rit esse alia logica docens, cuius non est effectus, nego consequentiam. ad probationem 2ae
partis distinguo antecedens: actus eiusmodi est unus et merus regulans lo
gicae, concedo; est merus unus, nego antecedens, et consequentiam.

13. Explico solutionem: haec definitio
divisionis, verbi gratia, modus sciendi totus in suas partes dividitur, est effectus
logicae definitivae: unde requirit esse logica docens definitiva; at cum huic
non ponitur, quod sit logica docens divisiva; hic talis definitio divisionis
non est merus unus regulans logicae, sed est unus logicae definitivae, et
doctrina, sive regula logicae divisivae. nota, quod logica unitata illa
appellanda est, ex cuius directione actus fit: unde logica definiti
va, ut praecise dirigens ad definiendum divisionem, apte dici potest logica
unitata; at ipsa definitio divisionis logica utens appellari debet.

14. Dico 2o: modus
sciendi extra materiam propriam logicae constructus non est logica utens. probatur:
talis modus sciendi non est proprie logica, ergo non est proprie logica utens. Tota
ex dictis bene patet, quia respectu cum unitate nomine generica proprie
tali respectu quantitatis cum unitate ratio specifica proprie
tali. quod autem ratione debeat; quia modus sciendi extra materiam
propriam logicae constructus, ut sunt definitiones, divisiones, et argumentationes, quae fi
unt in materia physica, metaphysica, aut theologica, licet non dirigit

ma. Doctr. Omnibus Con. 2a D. 20. et iuxta nostri opinionem di-
citur lux destinata rectoris . intellectus ad sui regulas: qui talis modus reg-
endi non proprie logica.

15. Hinc colligitur descriptio logicae, pro ut est docens, logica docens,
logica utens, usus logicae. logica docens est actus, quatenus praecise dirigit ad
modum sciendi. logica utens est actus, quatenus dirigens ad modum sciendi, exigit
est modus sciendi. usus logicae est actus, quatenus procedit est a logica directus. exem-
plum ut: definitio est oratio explicans. exemplum 2. divisio est modus sciendi totum
in suas partes dividendo. exemplum 3. homo est animal rationale. Hinc etiam colligitur, quod ora-
tio ut dicitur divisio logicae in docentem, et utentem, admittenda sit.

16. notabis tamen, haec
logicae divisio in docentem, et utentem, esse facta in ordine ad membra assignata reali-
ter distincta; quia licet aliqui actus sint docentes, et aliqui utentes, ex-
plures tamen actus sunt docentes, qui simul utentes sunt. ipse quia ad hoc
nec dicitur esse, ut a nobis explicatum, dicitur omnino necessaria; neque sit datur
alter modus melior, et magis proprius, quo explicari possit termini
a modo dico, ut postea dicemus.

17. Obiicies tamen ex quo proximo modo differ-
entiae est dicta logicae in docentem, et utentem, atque illa membra sint tamen realiter
confusa, et logica utens restringitur; sed logica utens recta, est logica pro ut
actualiter dirigit, et pro ut cum exercitio doctrinae iungitur: ergo
logica pro ut actualiter dirigit, et pro ut iuncta cum exercitio doctrinae, non
sic diffinita, totum sit vera logica. Ideo in vera utilitate simul
totum logicae actualiter dirigit, et cum exercitio doctrinae coniuncta est: ergo
non totum in vera logica, sed etiam in vera aliarum facultatum, pro
logica proprie dicitur logica utens.

18. Respondeo negando: cum est dico improprie logicae
in docentem et utentem, et sic illa ratione dico de illa; ideo est dico propria
logicae in docentem et utentem, et sic illa ratione dico de, non nego: concedo mi-
nor, nego conseq. explicatur dico proprie tali, quando dividitur logica in docen-
tem et utentem proprie tali, debent fieri per membra, quae participant rationem di-

unionis; quia si locus rebus absoluta sit loca faciet, ubi participabit naturam loci; at locus rebus distincta non sit verus locus, sed mera carentia localitatis, sicut proprie loca; nec enim participabit naturam loci; neque probat ex ratione nostra premissa: quod secundo a contrario proprio; sed requiritur quod ex aliqua natura participent rationem communis.

19. Dices: locus rebus absoluta est locus [illegible] hora, est locus proprie distincta: ubi locus rebus realis est [illegible] ratione, est locus per actualiter distingui; ut [illegible] D. [illegible] [illegible] [illegible] sit unicus ita: [illegible] locus [illegible] quod [illegible] sit proprie. [illegible] quia non est dicta locus [illegible] et unica; [illegible] [illegible] [illegible] [illegible] [illegible] locus [illegible] [illegible] distincta [illegible] [illegible] actualiter distinguit [illegible] et [illegible] locus [illegible] [illegible] locus autem [illegible] proprie [illegible] [illegible] non est proprie unica.

20. Obiicies denique: ista loca est unica quae facit [illegible] [illegible] [illegible] [illegible] [illegible] mag. loca [illegible] [illegible] ad modum [illegible]: quod est loca unica = [illegible]. [illegible] [illegible] [illegible] [illegible] ad modum [illegible] [illegible] [illegible] sit loca unica, quia [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] extra mag. loca [illegible] [illegible] ad modum [illegible] [illegible] quia [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] atque adeo quia non est proprie loca, ideo neque est loca unica.

C. 2

Duplex Quaestiuncula Resolvitur.

21. [illegible] quaestiuncula est: an omnes loca [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] unica? [illegible] [illegible] Franciscus [illegible] Metaphysica C. 3. Q. [illegible] Q. [illegible] [illegible] A. 20. [illegible] [illegible] loca [illegible] [illegible] unica [illegible] [illegible] [illegible] [illegible] [illegible]

ex ipsius parte materiae. oppositum tenet Pater Oviedo Con.10. p.20. hoc intelligitur, et sequentem probo: nam syllogismus consequutio logicalis praecepti logicae, et ex eius directione: quia effectus dimanat [illegible] logica [illegible]: [illegible] est unius logicae [illegible]: atque ab eo logica potest ac utens etiam [illegible] parte [illegible].

22. ut melius capiatur doctrina logicae [illegible] utentis, hoc ex [illegible] syllogismo: nam omnis explicatio est clarior explicato; sed definitio est explicatio definiti: ergo est clarior definito. [illegible] ex parte logicae sophisticae utentis, hic syllogismus, quia argumentatio sophistica generat errorem; sed oratio quae [illegible] [illegible] argumentatio, non tamen est vera argumentatio, sed apparens sophistica; ergo [illegible] errorem. nota, quod [illegible] aliquando [illegible] [illegible] logicae sophisticae [illegible] logicae [illegible] ex parte logicae utentis, ut ex supra dictis facile colligitur.

23. dices ex patribus, Fonseca, et Complutensibus: syllogismus [illegible] logicae [illegible]: ergo non est unus logicae, quia unus dirigi debet a doctrina: ergo non est logica utens ex parte [illegible] = [illegible], [illegible]: quia non est unus [illegible] logicae, [illegible]; non est unus logicae [illegible]; [illegible] ratio est [illegible]: [illegible] ex supra dictis quomodo [illegible] dirigi debeat a doctrina: ipse non [illegible] [illegible], nec actus [illegible].

24. [illegible] quaestiuncula: [illegible] omnis habitus logicae docentis [illegible] habitus logicae [illegible] ex ratione actus logicae docentis generari [illegible] ex [illegible] actus logicae utentis habitum generari. [illegible] ex dictis, actus [illegible] [illegible] parte docentis, utentis actus [illegible]: [illegible] ex docentis simul et utentis, ut [illegible] dico est modus [illegible] totius in suas partes distribuere. Pater Quiroga [illegible] Amicus [illegible] n.9. [illegible] Pater Oviedo [illegible]. 2. p.2. n. 15. [illegible]

omnes Thomisti tenent opinionem, apud Magistrum Philosophiae d. Q. 8. n. 2.

25. arguitur contra Patrem Reinaldum, contra illam opinionem: probo: ratio legis aeternae immediate fertur ad omnem legem; sed in omni ratio legis divinae immediate fertur ad omnem legem: ergo in omni ratio legis divinae est ratio legis aeternae. maior constat: nam sicut ratio legis divinae immediate fertur ad dictam legem, ita ratio legis aeternae tamquam immediate fertur ad omnem legem. probatur minor: nam ratio legis generaliter exactissime legis pure divinae non fertur immediate ad omnem legem: ergo. ratio est; quia ratio generalis acquisitiva solum fertur immediate ad actum similem illi, per quem generatur; ratio vero similiter ratione aliquam: ergo.

26. maior tamen constat: quia ejusmodi simplex repugnantia videtur, altera ratione magis alia vero ratione, ut; sed ea acquiritur per rationem tantum, ut constat, est, quae extra acquiritur per rationem legis divinae: ergo superflua erit ratio legis aeternae distincta ab ratione legis divinae. = respondetur per rationem tantum, quae ejusmodi etiam est, acquiri utrique difficultatem, quia sola ratione magis ac difficilius, quae ipsa duo ratione sunt, acquiritur omnino per rationem legis divinae; quia artificium operis logici superat difficultatem quoad suam cognitionem, et etiam quoad executionem: ea acquiritur per rationem legis divinae; ea vero per rationem legis aeternae superaddita est.

27. arguitur 2o: ratio legis divinae fertur ad omnem singularem legem: ergo est alia ratio legis aeternae. probatur consequentia: quia ratio legis divinae est practica, habet eumdem modum operandi: ergo. = distinguo antecedens: ratio legis divinae fertur mediate ad singularem legem, concedo; fertur immediate, nego. nec adiungo formationes singulares; nec est ratio legis divinae sit practica tantum,

quod medium fiat ad opus legis, quod tamen non sufficit, ut [illegible] actus legis utilis.

28. Explico solutionem: actus legis [illegible] simul [illegible] [illegible] per [illegible] actus [illegible] [illegible] [illegible] difficultas quod [illegible] [illegible] legis; et non [illegible] [illegible] in opus legis [illegible] in [illegible] [illegible] [illegible]: [illegible] difficultas quoad [illegible] [illegible] per actus legis [illegible], quicumque simul [illegible] [illegible] in [illegible] in opus legis, [illegible] opus [illegible] actus [illegible] [illegible] modi actus [illegible] est. [illegible] actus legis [illegible] [illegible] in actu [illegible] modi [illegible], [illegible] [illegible] medi[illegible] [illegible] ad [illegible] [illegible], [illegible] [illegible] [illegible] medii actibus [illegible] [illegible], quae [illegible] [illegible] fiat ad [illegible], et [illegible] [illegible] mediante ad opus, [illegible] [illegible] [illegible].

29. [illegible] ex Magistro [illegible] [illegible] [illegible] actus [illegible] [illegible] [illegible] [illegible] [illegible], et [illegible] [illegible] ad [illegible] [illegible] [illegible]; sed actus legis [illegible], et actus legis [illegible] [illegible] [illegible] [illegible], et [illegible] [illegible] [illegible]: [illegible] actu legis [illegible]. [illegible] [illegible]; [illegible] quia actus dilectionis Dei, et actus dilectioni proximi [illegible] [illegible] [illegible] [illegible], et [illegible] [illegible] [illegible] actu Charitatis Theologicae [illegible]. [illegible]: [illegible] [illegible] bene [illegible] est per actus legis [illegible], quae [illegible] difficultas, quoad [illegible], [illegible] [illegible] [illegible] difficultas: [illegible] non [illegible] actus [illegible] legis [illegible]. [illegible]; quia difficultas, [illegible] [illegible], [illegible] est materialis ex [illegible] [illegible] [illegible], et [illegible] [illegible] [illegible] [illegible] [illegible].

30. [illegible] [illegible] [illegible] actus [illegible] [illegible] [illegible] [illegible] [illegible], et [illegible] [illegible] [illegible] actus [illegible] [illegible] [illegible] [illegible], [illegible] [illegible] [illegible] actus [illegible] [illegible] [illegible] [illegible] [illegible],

scilicet quod nisi vel in actione [illegible] abstracta ex parte objectione nihil vaget. ipsum habitum in terminis charitatis theologice non sistunt adaequate dilectionem, sed principium est ac proxime potentia operandi dilectionem. Ubi actus dilectionis dei et actus dilectionis proximi respiciant idem objectum formale et specificantur charitatis theologicae, ut dicitur, quod habemus actus dilectionis proximi, qui reducuntur ad eadem habitum in terminis charitatis theologicae [illegible]. at in illa [illegible] habitibus acquisitis [illegible] non ipse [illegible] potentia [illegible] proxime potentiam operandi sed tantum facilitatem ad actus similes iis, a quibus ipsi generantur.

31. ad [illegible] rationem notatur, et [illegible] rationi. Ut autem dicitur, quae sunt [illegible] esse vergens, [illegible] prescribentes modum discurrendi [illegible] tenet; [illegible] igitur quod [illegible] adsunt, et [illegible] quod [illegible] ipsa [illegible] addiscitur [illegible] ibi [illegible] positis, adhuc tamen nisi praecesserit usus ci[illegible] discurrendi, [illegible] difficultatem [illegible]; hoc autem difficultas oritur ex [illegible] per [illegible] logicae [illegible], qui [illegible] relationem [illegible] [illegible]: licet [illegible] [illegible] per [illegible], quia tamen [illegible] difficultatem experimur in tali reflexione [illegible].

32. [illegible] nota, quod [illegible] modi [illegible] extra [illegible] [illegible] logicae [illegible] logicae utentis, ut [illegible] manet; ita [illegible] generatus ex relatione talis utentis aut logica naturali utentis. nota igitur quod [illegible] [illegible] logicae, qui [illegible] logicae [illegible], et simul logica utens, solum est [illegible] diversas [illegible] diversi; ita [illegible] logica naturalis [illegible] et simul utens, illa [illegible], quae generatur exactibus, qui [illegible] modi [illegible] praescribunt, et [illegible] modi [illegible] [illegible] [illegible] aliquis, [illegible] naturalis logicae [illegible] [illegible] [illegible] naturalis utentis, [illegible] omni [illegible] [illegible] naturalis logicae

42. Resp. ... de habitibus: facilius, quod generat exactius logicae defensivae cum iubet... dici et habitus facilior ... logicae argumentativae. ... praedicta

in definitio est substantialiter [illegible] ad actus argumentandi, et tamen

competit, quia caret speciebus circa argumentationem: ergo [illegible] specie

[illegible] acquisitis per actus argumentandi illa substantialiter [illegible]. [illegible]

[illegible] [illegible], [illegible]; [illegible] ad actus argumentandi.

43. [illegible] est [illegible]

[illegible]: [illegible] quod [illegible] per actus [illegible] expeditius [illegible] [illegible]

ad definiendum [illegible], quod [illegible] habitus [illegible] [illegible]

[illegible]; illud tamen ex [illegible] [illegible] [illegible], [illegible]

quod [illegible] [illegible] habitus definitivus acquisitus [illegible] speciebus, quam

[illegible] [illegible] expediat [illegible] facilitatem ad actus argumentandi [illegible]

[illegible] [illegible] habitus [illegible]: [illegible] quod [illegible] per [illegible] [illegible] ex[illegible]

[illegible] [illegible] facilitatem ad definiendum [illegible] [illegible] habitus [illegible]

[illegible] [illegible] [illegible] quod [illegible], quod ille habitus sit [illegible]

[illegible], [illegible] [illegible]; [illegible] [illegible] [illegible] [illegible] [illegible]

quod habitus definitivus sit substantialiter facilitas ad actus argumentandi

[illegible] [illegible], quod ille habitus sit substantialiter facilitas ad actus [illegible]

[illegible].

44. [illegible] habitus definitivus [illegible] ad actus argumentandi

per illas species, quas [illegible] [illegible]: [illegible] ratio [illegible]. [illegible]

[illegible]: [illegible] habitus definitivus [illegible] [illegible] [illegible] actus argumentandi, [illegible]

[illegible] [illegible] [illegible], [illegible]; quia [illegible] habitus [illegible] [illegible] [illegible]

[illegible] actus [illegible] [illegible]; [illegible] [illegible] est; actus autem argumentandi [illegible]

[illegible] similes actibus, a quibus habitus definitivus generatus est [illegible]

[illegible] [illegible] [illegible]. [illegible] [illegible] [illegible]: quia [illegible] habitus

[illegible] modo [illegible] [illegible] ad actus, [illegible] [illegible] [illegible] [illegible]: [illegible]

[illegible] definitivus [illegible] [illegible] [illegible] actus argumentandi [illegible] [illegible]

species illas, [illegible] [illegible] modo [illegible] ad actus argumentandi.

45. [illegible] est [illegible]:

habitus [illegible] [illegible] est [illegible] substantialiter; et [illegible] ad actus [illegible] [illegible]:

[illegible] [illegible] habitus [illegible] definitivus [illegible] [illegible] substantialiter, et [illegible]

ob actus argutiorem. Ita dato argumento in quantitate. [illegible]: ratio[illegible] legis [illegible] est [illegible] substantialis, et [illegible] ad actum legis [illegible], ratio legis [illegible] nec [illegible] distincta ab [illegible] legis [illegible]: sed ratio legis [illegible] est [illegible] distincta ab [illegible] legis [illegible] ut [illegible] [illegible] [illegible]: ergo ratio legis [illegible] non est [illegible] substantialis et [illegible] ad actum legis [illegible]. [illegible] [illegible]; [illegible] illa ratio [illegible] non est [illegible] distincta ab [illegible] argumento [illegible] [illegible], quia illa est [illegible] substantialis, et [illegible] [illegible] argumentum. ergo.

46. Nulla autem petitur [illegible] habitualis cum ea unitate morali, quae est: [illegible] actualis cum ea unitate morali: ergo [illegible] habitualis. [illegible] [illegible] [illegible]; [illegible]: [illegible] [illegible] ad [illegible] ordinatur, [illegible] ad [illegible] attributionis [illegible] [illegible]: ergo [illegible] actualis cum ea unitate morali. [illegible] [illegible] [illegible] [illegible]: [illegible], quia ob [illegible] [illegible] ad [illegible] [illegible] [illegible] [illegible] unitatis. [illegible] [illegible] [illegible], [illegible] [illegible] [illegible] una [illegible] unitate morali; quia [illegible] [illegible] attributionis [illegible] [illegible] [illegible] [illegible] ordinatur [illegible] [illegible] [illegible] [illegible]: [illegible] [illegible] ad [illegible] [illegible] [illegible] [illegible]; sed [illegible] actualis [illegible] [illegible] et attributionis [illegible]: ergo [illegible] [illegible] [illegible], et [illegible] attributionis [illegible]: ergo sicut [illegible] actualis cum ea unitate morali, ita et [illegible] habitualis.

47. [illegible] [illegible] [illegible] habitualis [illegible] una [illegible] [illegible] unionis, [illegible] ex [illegible] [illegible] [illegible] ad [illegible] [illegible]: [illegible] [illegible] [illegible] [illegible]. [illegible] [illegible] [illegible]: [illegible] [illegible], et [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] ubi [illegible] [illegible] [illegible], [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] habitualis [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] moralis [illegible] unitas.

C. 4.

Solvuntur argumenta.

48. [illegible]

divum Thomam 1a. p. Q. 54. a. 4. ubi ait: in continentibus ratio etiam ea, atque reperitur in numeris in quibus multiplicitatem, ratione illius multiplicitas ordinatur ad aliquid unum, ad quod principaliter respicit ratio, sic est, quod ratio est in [illegible] complexa constituta ex pluribus rationibus omnis, sic ad plura se extendat; atqui ratio legis licet ad plura se extendat, ordinatur tamen ad aliquid unum, quod principaliter respicit, videlicet, [illegible] di univoce: ergo.

49. Hac divi Thomae auctoritate universaliter confirmatur ab Philosophorum Angelici Praeceptore ipso asserente quam [illegible] Philosophorum Angelici Praeceptore ipsius ... sunt [illegible] [illegible]; ne ut [illegible] Q. 3a. prolegi mei divi Thomae [illegible]. quod tamen [illegible] ... aliqua ipsius Angelici Praeceptoris testimonia. ipse 1a. 2ae Q. 52. A. 20. ubi ait: non enim ratio, et dispositio dat speciem habitui, neque item in sua ratione includit indivisibilita[tem]. et ibidem Q. 54. A. 20 in corpore: 2um mea ratio dispositionis, uno quidem modo ex principio activo talium dispositionum (quo nomine ratio vocat) alio vero modo ex natura, tertio vero modo ex obiecta specifice differentia; atqui ratio legis refert principia activa specifice differentia, generantur [illegible] ab actibus specifice diversis: et praeterea ea refert obiecta specifice diversa, regere, definitione, divisione, [illegible]: ergo non [illegible].

50. Neque ex testimonio nostri obiecto [illegible] quod ille ratio, quae licet ad plura se extendat, ordinatur ad aliquid unum unitate specifica, non componatur ex pluribus rationibus specifice diversis; atqui [illegible] quod non componatur ex pluribus rationibus pluralitate [illegible] ut [illegible] [illegible] exibit [illegible] eiusdem Angelici Doctoris, scilicet, in eo quod unus est multiplicitatem in numeris; et exibit [illegible] [illegible]

illa multiplicitas ordinatur ad aliquid unum: et de veritate Di-
vi Thomae testimonio ex Thomistica schola unanimiter
eam probat, quod natura logica sit simplex qualitas simpliciter opposita
multiplicitati individuali.

52. adde, quod nec praeiudicet, quod lo-
gica naturalis sit qualitas simplex per exclusionem multiplicitatis
specificae. nam, quia ibi loquitur divus Thomas de natura, ut res-
picit primario aliquid unum unitate specifica; atque ita natura logica,
ut patet, non respicit primario aliquid unum unitate specifica, sed
tantum unitate generica: ergo ipsa logica naturalis quamvis totalita-
te constet partibus actualibus specifice diversis, ordinatur tamen ad
componendum unum scientiae simplex sicut ipsa componitur ex ... speci-
fice diversis; denique ordinatur ad componendum unum totum simplex specifice.
et de ratione compositi unius dividitur totum, et animae ... per
se actuales; quoniam natura est adaequata compositio, ubi logica na-
turalis dividitur ... totum actuale simplex, natura definitur dividi-
tur, et ... quoniam quilibet habet adaequatam logicam naturalem.

53. ...
et, ... divi Thomae, ... quod acquisitio in natura unius conclu-
sionis, non acquiritur novus habitus per demonstrationem alterius con-
clusionis; ita acquiritur novus partialis habitus, ex quo illud prior habitus

re, prior quae posterior ordinat ad se, proinde erunt notae per fectionum, et ab plena recesserit.

Sed dices 2o: perfectio complexionalis [illegible] plena relata subiecti ratione, nisi respectu plenioris [illegible] perfectionis partialibus; ut libet [illegible] plena subiecti ratione nomine: ergo [illegible] plena relata subiecti ratione [illegible] requirit ex plenioribus [illegible] partialibus; et [illegible] definitione, et [illegible] subiecti ratione, [illegible]: ergo [illegible] ex plenioribus [illegible] partialibus. Hoc argumentum [illegible] ad omnia [illegible] generalia cum [illegible]: ergo et [illegible] subiecti [illegible] 2o: [illegible] omni, ut [illegible] perfectio omni [illegible].

Sed [illegible] [illegible] dicendo [illegible] perfectionalis [illegible] plena relata subiecti ratione, [illegible] specifica [illegible] ex plenioribus perfectionis partialibus, omnino; perfectio [illegible] plena relata subiecti ratione, [illegible] subalterna [illegible] [illegible]: [illegible] quod [illegible] divisibili [illegible] ut plena [illegible] (ut [illegible] rationibus [illegible]) quod [illegible] specifice [illegible], [illegible] ex [illegible] [illegible], et [illegible] perfectionis [illegible].

Sed explico [illegible]: omnino [illegible] perfectionalis [illegible] subiecti ratione [illegible] specifica [illegible] ex plenioribus perfectionis partialibus, quod facile negari [illegible] perfectio [illegible] perfectio [illegible] plena subiecti ratione [illegible] subalterna [illegible] ex plenioribus perfectionis partialibus; quia [illegible] [illegible]

Neque etiam potentiae; nec potentia cadit circa [illegible]; ex [illegible] a [illegible]; neque per unionem novi, quae erat in tenebris ex [illegible] luce in perfectione sui [illegible]; nec modificatur mediante luce adveniente: ergo nec novam dispositionem perfectivam in se, nec modificatur per speciem acquisitam praeter actum cognitionis ad [illegible].

69. Igitur in potentia illa extrinseca, quae datur in nocte [illegible] e in tenebris, non solum per additionem potentiae; quia supponitur per unionem [illegible] tali ex parte principii; atque sub hac parte defectus non est [illegible] facilis ad actum cognitionis; ergo difficultas, quae [illegible] hunc defectum ad actum cognitionis [illegible] per novam [illegible] ut patet. principio 2ae: scientia est cognitio per demonstrationem acquisita. 2ae:
omnis demonstratio debet esse ex tribus et 3 demonstrabilibus principiis
unde est desumitur ex Aristotele 1o posteriorum C. 2. et
2o. neque vero quaevis conclusio scientifica, contracta deducitur per
demonstrationem ex tribus et 3 demonstrabilibus principiis: ergo vel
immediate, vel mediate; neque vero intellectus sine logica artificiali potest
facere conclusionem, quae immediate fluit ex tali principio: ergo sine
logica artificiali conclusionem componere potest. neque vero intellectus sine
logica artificiali potest deducere conclusionem, quae mediate fluit ex
tali principio; cum nempe, deducendo ex prioribus conclusionibus
deducitur: ergo.

83. Respondebis itaque: ad scientiam quamvis perfecte comparandam
non sufficere, quod aliquis conclusiones ex tali principio deducat;
sed ulterius requiritur cognitio de bonitate illationis, quam
potest habere sine logica = artificiali: quia cognitio de bonitate illa-
tionis sine logica haberi potest: ergo responsio nulla. Probatur: nam cogni-
tio ... [illegible] ... ad necessariam connexionem principiorum
cum conclusione est practice, et exercite cognitio et ... de bonitate
illationis; immo ex hoc ... potest cognitio reflexa, quae potest
conclusionem deductam non debere se esse ... posito illo principio;
... intellectus sine logica potest habere cognitionem ...
... cognitio connexionem principiorum cum conclusione ergo.

84. ...

... ad ... scientiam ... logica artificialis est moraliter necessaria ad alicuius scientiam ...
... comparandam. probatur: quia sine logica artificiali nimis longe magno
... difficultate comparari potest perfecte alicuius scientiae: ergo est moraliter ne-
cessaria ad alicuius scientiae perfecte comparandae. ... bene, ... moraliter
... existimatur, illud esse moraliter necessarium ad aliquid, sine
quo aliquid ... nimis magna difficultate comparari potest. ...
probatur: quia sine logica artificiali ... circa demon-

naturae magna difficultate superari, ex quibus constat, quod particula quodcumque [illegible] ex sui perfectioni salutiones. et ex his eius (?) elationibus aliis: = Itaque ex Augustino praecipue lib. de Correptione c. 2. s. 2. dicit: lege divina neque volumus, neque sine eo natura quidem.

C. 1.

Solvuntur argumenta.

85. Arguitur 1o. Quod sine lege naturali posset sufficiente operari aliquod bonum, sufficiente salutionem, non patet, quod possit omnes: ergo ab sufficientia perfecte operandi lege naturali imperfectum necessarie. 2o patet 1o: quod unum malum possit aliquis superare, non patet, quod possit omnes; 2o: quod homo sine speciali dei gratia possit vitare aliqua peccata venialia, non patet, quod omnia possit; 3o: quod natura sine nulla medicina possit aliquas graves tentationes superare, non patet, quod possit omnes: ergo a pari.

86. Ad 1m. Aliqui patiores concedunt, ne leg. dispensatione: quia per victoriam alicuius inter corporales minimus est; at per deductionem alicuius salutionem virtutis ... sed perficit, et gratia est expeditior, et alacrior. Adde, quod similiter post victoriam ... voluntas virtutes patitur, potest ipsa omnes successive superare: ergo similiter gratia acquirit una salutione valetudinem acquirere sanitatem. = Ad 2m partio dico, quod homo sine speciali gratia est possit vitare omnia peccata venialia, sed perfecte ... possit. Homo itaque sine speciali Dei gratia etiam vitare possit ad omnia venialia vitationes. Ad quid ergo nos?

87. Ad 3m patiores concedunt, ne leg. dispensatione: quia omnes tentationes graves superare adeo non

solus diligat genus omnes aut minus diuturnas, vel aliquae eius excedat vires nat.; at tentationes omnes ? graves adjiciens solus diligat genus omnes, aut minus diuturnas: [illegible] sicut [illegible] tentationes, ita et aliquas graves adjiciens contritione [illegible], quod [illegible] positus [illegible] sic: quia [illegible] [illegible] exercitio [illegible] tentationes [illegible] [illegible] contritione [illegible] tentationes.

88. Argum. 2o: voluntas humana sine speciali auxilio Dei potest elicere actum naturalem amoris Dei, [illegible] actus [illegible] naturalis: ergo [illegible] sine [illegible] auxilio contritione [illegible] perfectae [illegible], [illegible] perfecte. = omitto [illegible], quod ab aliquibus Theologis non admittitur, [illegible] ideo [illegible] requiritur speciale auxilium Dei ad amorem super naturalem, quia [illegible] voluntate [illegible] sufficiens, [illegible] amoris super naturalis; at [illegible] semel [illegible] sufficientis [illegible] ad perfectam contritionem [illegible]. = [illegible] argumentum sic: [illegible] voluntate sufficienti [illegible] ad unum actum super naturalem [illegible] ad [illegible]: ergo similiter.

89. Argum. 3o: contritio perfecta [illegible] est illa contritio per [illegible] sed [illegible] sine [illegible] auxilio: ergo sine illa [illegible] perfecta contritio. = Respondeo neg.: contritio perfecta [illegible] est illa contritio per [illegible], [illegible] contritio per [illegible]; [illegible] accidentaliter [illegible]. ideo [illegible] Tridentinum C. 2. 93. Arguunt 3°:

ad actum bonum completum requiritur directio prudentiae: sed [illegible] ad actum [illegible] directio legis. = Respondeo [illegible] in lege; ut ad actum voluntari [illegible] praesupponi actus conscientiae juxta illud, nihil volitum quin praecognitum: nec requiritur [illegible] elicere actum bonum, [illegible] [illegible] praecedat cognitio ipsi proponens bonitatem, [illegible] [illegible]; [illegible] [illegible] directio dictamen prudentiae [illegible] [illegible] voluntati bonum [illegible], malum [illegible] fugiendum: a quo dictamine prudentiae actus voluntatis [illegible] [illegible]; atque ad actum conscientiae [illegible] [illegible] praesupponi actus legis; [illegible], [illegible] dixi, actus [illegible] [illegible] perfectionem [illegible] [illegible] [illegible] [illegible] principii, quae [illegible] [illegible] ad conscientiam [illegible].

94. Arguunt 4°: conscientia [illegible] [illegible] quae [illegible] judicatur sine lege: sed [illegible] [illegible] ad hoc [illegible]: [illegible] [illegible] [illegible] perfecte [illegible], [illegible] [illegible] in [illegible] [illegible], [illegible] conscientia [illegible] [illegible] [illegible] [illegible] = [illegible] [illegible] [illegible] [illegible] sine lege [illegible] = Respondeo [illegible] [illegible] ille [illegible] absolute [illegible] per hoc, quod [illegible] [illegible] [illegible] [illegible] conscientia sine lege [illegible] [illegible] [illegible] [illegible] [illegible] principiorum, et [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] conscientia [illegible] ex defectu legis, sed ex defectu [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible].

95. [illegible] lege [illegible] [illegible] [illegible] [illegible]: sed [illegible] [illegible] sine lege ex [illegible]: sed [illegible] in [illegible]

scientifice, sed imperfecte = itaque ergo, distinguo consequens: consequentia [illegible]
de Logica ex parte causae, quae per se requiritur, concedo; quae non
per se requiritur, nego hanc, et alteram consequentiam. Itaque Dicimus
quod sine arte teneri possit per exactam formationem propo-
sitionum, et illarum necessariam connexionem in conclusione.

96. Itaque tenemus ex
Divo Augustino L. 2. C. 2. de ordine, ubi [illegible]
[illegible] inquit: Logica docet docere: docet discere. R. = ad hanc
sententiam dico ad logicam spectare quod omnes scientias [illegible] docere
& discere; ipsa est sola methodice tradere omnium scientiarum [illegible]
scientiam: et haec mens divi Augustini loco ab adversariis cita-
to; at non docuit sanctus Doctor, quod non possit quis acquirere
in ordinem scientiam sine Logica dialectica.

97. Arguitur 6.° sine causa uni-
versali sequitur non posse effectum dari; sed Logica artificialis est cau-
sa universalis cujusque demonstrationis, utpote cujusque scientiae: ergo = Ne-
go minorem; nam maior; quia omnis scientia, ut [illegible]
ter docuit, est ex veris, et indemonstrabilibus principiis: ex de hac
principia, non autem Logica, sunt causa universalis cujuslibet demonstra-
tionis. Igitur ad summum dici potest, quod Logica artificialis sit c-
ausa universalis cujusque demonstrationis, non ut [illegible] [illegible],
sed ut facilius, et expeditius detur: ex quo tantum sequitur, quod
Logica moraliter necessaria sit ad quaslibet demonstrationes, quod
non negamus.

98. Itaque quaelibet demonstratio, est artefactum logicae; sed
quodlibet artefactum requirit ad suum esse artem [illegible]
est. ergo ad quaslibet demonstrationes requiritur ars
logicae = distinguo maiorem: quaelibet demonstratio est artefactum lo-
gicum [illegible] concedo; [illegible], sub distinguo: est artefactum fac-
tum logice, concedo; est [illegible] extrinsece, nego maiorem. Distinguo etiam minorem

consequens tale, non minus ac loq.

99. explicatur quomodo demonstratio

habet in Deo, quia a voluntate sic concurrit. Dicendum dato
concursu, et tertio: in cognitione obiecti directe concurrit cum vo-
luntate ad actum amoris eliciendum; quia voluntas cognitione
obiecti illuminata, ut amorem actus eliciat.

105. Quaeritur 2°: an cognitio ad

simile, et simplicissimo ex parte cognoscentis cognoscit. Ad 3ᵘᵐ distinguo, et respondeo: illustrissimi Dialectici nil contra; quia ex communi totius scholae, insequitur: quod modus cognoscendi per modum generis in specie; quia negativa super obiectum alio modo ex parte cognoscentis, ac obiectum est in se, absque difformitate requirit cognitionis divisione praecisive, quia iuxta communiter, non cogit quia ille modus cognoscendi per modum generis, &c; in aeternum non requirit, cum necessarium obiectum, absque ulla omnino difformitate requirit cognitionis divisione praecisionis; nam quo modo relative necessario est in relatione se; quo modo cognoscitur est praecisivus, aut praecisionis suppositio; et in universali, absque praecisione, sed cognitio divisione requirit.

262. Dico 2ᵒ tale sub nulla speciali abstractione a materia procedit specificatione Logicae; nam obiectum tale Logicae habet speciatim Logicae sub aliqua speciali abstractione a materia: ergo generale requirit de obiecto formale Logicae. Atque adeo obiectum tale est generale obiectum, est. Probo maiorem: nam generalem rationem sub abstractione a materia signata, sive sub individuali specie Physica, quae versatur circa corporale abstractum a singularibus; sub abstractione 2ᵃ a materia sensibili speciei Mathematicae, quae versatur circa quantitatem ab accidentibus sensibilibus, et tertio sub abstractione ab omni materia speciali Metaphysica, quae versatur circa ens abstrahendo a materia signata, sensibili, et intelligibili: ergo est sub nulla speciali abstractione a materia procedit generale specificativum Logicae.

insuper observandum 1ᵒ quod praeter intellectum agentem et passivum, sunt multi: nam ad primum non seorsim agimus principium, quod tale est specificativum, quia tale est speculativum, et ideo propter animam quae spiritualis est, in corpore tali tantum relative ab ipsa anima; quia separata, ideo ad quam speculativa per se; quia est ens reale, et anima spiritualis est, nec intellectus nomina, sed ratione dicitur est speculativum Logicae: ergo tale est Logica quae est generaliter; atque adeo Logica dicitur speculativa: quod hic dicitur. Observandum 2ᵒ quod specificatio scientiarum aliquando desumi a ...

uniti abstractionibus ratione quarum specie diversæ respiciunt seu obiectivo eodem abstractione a materia; sicut Mathematica, et Metaphysica abstrahunt a materia [illegible], [illegible]; et omnis abstractio est a materia sensibili; ergo Animastica, et Metaphysica sunt specifice diversæ: Ergo diversitas radicis scientiæ est desumenda ab abstractionibus Thomisticis; ergo specie diversitas scientiæ debet oriri ab specificatione diversa. Confirmatur: specificatio scientiæ sumitur ab abstractionibus Thomisticis, quod non oritur speculativa Physiologia moralis [illegible], [illegible] Logica, et Physiologia moralis [illegible] specifice, [illegible] [illegible] ipsa speculativa; [illegible], [illegible] [illegible] [illegible] [illegible] [illegible]; sicut [illegible] [illegible] [illegible] abstractione a materia [illegible] specificatione Physiologia moralis: qui plura [illegible] [illegible] P. demonstrationum: Probo: nullus Logicus nescit hoc principium directivum omnium demonstrationum, sive omnem logicam pro demonstratione acquirit. Minor videtur est certa; quia id, quod absolute non est evidens, requirit esse principium directivum demonstrationum, quod [illegible] [illegible] evidens. Secundo [illegible] dicendo, quod non datur hoc principium directivum omnium demonstrationum applicatum: sit vel demonstrationem. Ratio est, quia [illegible] non datur illud principium evidens ratione sui, sive per se notum, et indemonstrabile, quod sit hoc principium directivum omnium demonstrationum; vel [illegible] quale [illegible] sit: de [illegible], non datur illud principium evidens ratione alterius, quod sit hoc principium directivum omnium demonstrationum; quia si esset evidens ratione alterius, hoc esset per demonstrationem acquisitum. Et consequenter non datur principium directivum omnium demonstrationum; nisi non esset directivum huius demonstrationis per quam acquiritur. Dico: Probo non datur hoc principium directivum omnium demonstrationum, quod applicatur ad demonstrationem sit, utcumque [illegible] habeat esse evidens ratione sui, aut ratione alterius.

328. Similiter: datur hoc principium directivum cuiuslibet effectus: Probo: Omne [illegible] hoc principium directivum cuiuslibet demonstrationis; sed tale principium requirit esse aliud, nisi Logica. Probo [illegible] hoc principium directivum cuiuslibet demonstrationis. Ratio est, [illegible], disparitas: quia omnis effectus exigit [illegible] directivum; [illegible] nil possit produci a se ipso, de consequenti [illegible] ne procedatur in infinitum, ad aliquam causam, quae ita sit causa, ut non sit effectus. 342. Dico ex D. [illegible] [illegible], et [illegible] [illegible] [illegible]. Lib. 7. Matr. [illegible] N. 48: [illegible] [illegible] [illegible] [illegible], et [illegible], [illegible] [illegible] [illegible] [illegible] [illegible], [illegible] [illegible] [illegible] ex [illegible] [illegible]: et sola [illegible] [illegible] [illegible] [illegible] [illegible]; [illegible] [illegible], quod [illegible] [illegible] [illegible] ex [illegible] [illegible], [illegible] praxim: [illegible] ad [illegible] praxim [illegible]. [illegible] ex [illegible] 7. Matr. C. L. [illegible], [illegible] [illegible] [illegible] [illegible] [illegible]. [illegible], [illegible] [illegible]; [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible], et [illegible] [illegible] [illegible] [illegible] [illegible]. [illegible] [illegible] [illegible] [illegible], [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]

duplici causa: videlicet, quia 2°. dicitur circa ab una actione directoris, ab altera circa praemovens actione: quod utique opus ex se bonum sit ex natura rei, et ex directione cognoscentis animi magistri. Ergo: illa actio absolutione sit recte recta a cognitione, et ab obiectiva: quod utique opus bene sit et sua rectitudine a sua natura, et a cognoscentis dirigente deinde: opus esse erratum recte sit sine notione, in extrinseco est in practica cognitione: quod de amore beatifico considerando de quo, qua beatus loquitur modo, quo Deus amandus, dico, probamus supra; sicut de execratione magistri et in practico cognitione: ergo opus esse recte erratum, et quo ad executionem dirimibile subiecti libero, in perito voluntatis, sit ex in ejus directione executionis magistri: ad primum dico, Dyalog ex ore, ut alibi loci etiam de praxi, in practicis magis regitur praxi: in hoc autem similiter omne etiam formari praecepti opus regitur: de hoc de illo, quod ad rectam praxim in similitudine ordinatione operis regitur.

Obj. in primis, ad rectam praxim primo accipitur est, quod sit operatio esse dirimibilis in genere moris: hoc est, quod ponit in la scientia honestatis, aut in la representatione pi[illegible] moris. Non illorum est: ergo multa operatio esse dirimibilis in genere moris, quae sit operatio libera; id ad rectam praxim, ut ex dictis patet, multa operationi requiritur libertas: ergo. Respondeo: primum hic scire, quod sinonymum sit dirimibile per rationem praecepti, et quod practicabile a directione ex rationibus directione, est rectam praxim; id ad hoc, ut sit practicabile, est practicabile, primum accipitur dirimibile in genere moris: requiritur in dirimibilis hoc esse, quod ab Aristotele ad bonum, vel primum sit ratione; quod certe a Aristotele dialectice: ergo aliquo modo dirimibiles in genere moris primo accipitur ad rectam praxim.

344. Respondeo 5º ad notionem praxis nec requiri, quod opus sit erroris capax, nec quod procedat a Potentia erroris capaci. Probatur 1a pars: actus fidei divinae, et amor beatificus sunt praxis, et tamen actus fidei divinae, nec amor beatificus est opus ullius erroris capax: ergo ad notionem praxis non requiritur, quod opus sit erroris capax. Probatur pars 2a: Deus [illegible] Christi[?], et scientia [illegible] [illegible], quia dirigit ad productionem creaturarum, est practica: ergo operationes Dei ad extra sunt [illegible] notionem praxis; et tamen intellectus Dei errare non potest, ut omittis[?]: ergo ad notionem praxis non requiritur, quod sit operatio procedens a potentia erroris capaci.

345. Dices 1º contra 1am: Christus [illegible] in loco [illegible] docuit, quod praxis [illegible] circa opus, quod sit vel recte vel non [illegible]: ergo praxis [illegible] esse erroris operatio capax. Respondeo, Christus explicare [illegible] quod ratio sit ad praxim, et [illegible] [illegible] [illegible] Dominus[?] [illegible] praxi [illegible], [illegible] [illegible] ad praxim, quod opus sit capax erroris. Dices 1º 2o: [illegible] practica dirigit potentiam ad efficiendum opus sine errore: ergo supponit potentiam capacem ad errandum. Respondeo, [illegible] [illegible]: [illegible] [illegible] [illegible] [illegible], [illegible] [illegible] [illegible] [illegible] [illegible], potentiam dirigere ad efficiendum opus sine errore; [illegible] [illegible] [illegible] [illegible] [illegible] non [illegible] supponere potentiam capacem ad errandum: ergo nec [illegible] [illegible] supponere potentiam [illegible] modo capacem. [illegible]: [illegible] potentia [illegible] [illegible] ad non errandum [illegible], quod [illegible] [illegible] operandum exigat [illegible] [illegible] practicae [illegible] recte; [illegible] [illegible] [illegible] ad errandum [illegible] capacem potentiam supponere. C. 2ª.

Dubium[?] [illegible] Quaestio[?]

Resolutio.

346. Sit 1a conclusio: Logica est scientia vere practica. Probatur: Illa scientia est vere (et proprie) et simpliciter practica, quae versatur circa opus operationi opus factibile ex directione ipsius; sed Logica est scientia cognitiva quae versatur circa opus operationi opus factibile ex directione ipsius Logicae: ergo Logica est scientia simpliciter, sive scientia vere practica. Maior constat ex communissimo discrimine [illegible] practicae, et speculativae [illegible] ex eo, quod [illegible] speculativae [illegible]; practicae [illegible]. [illegible] ex practica, et quia non versatur speculativa circa opus operationi opus factibile ex directione ipsarum; practicae vero versatur circa opus operationi opus factibile ex ipsarum directione. Et exemplum prioris sit Metaphysica, quae [illegible] est speculativa, quia versatur circa [illegible] quod non est opus factibile ex directione ipsius. Et exemplum posterioris sit Medicina, quae ideo practica est, quia versatur circa [illegible] corporis sanitatem, quae est opus factibile ex ipsius directione.

347. Probatur itaque minor: Logica versatur circa [illegible] multiplici [illegible] modo, ut [illegible] monet; sed [illegible] est opus factibile ex directione Logicae: ergo Logica versatur circa [illegible] operationi &c. Probatur minor: [illegible] modus sciendi est [illegible] factibile ex directione [illegible]; [illegible] non est nisi Logica, ut dicit [illegible], [illegible] speciales [illegible] modi sciendi: ergo [illegible] modus sciendi est opus factibile ex directione Logicae.

348. Probatur 2o [illegible] ut [illegible] sine errore periculo dirigat, [illegible] regulis [illegible]; sed hoc [illegible] est Logica: ergo [illegible] Logicae [illegible] sub [illegible]: ergo [illegible] Logica [illegible]

dirigere ad finem suum: ergo [illegible] ars, quae habet dirigere intellectum ad suos bonos actiones, directe, et per se vere: ergo in modo [illegible] dirigit [illegible] opus practicum ab illa ex directione Logicae. Atqui [illegible] ex eius directione in opus, vere practica est: ergo Logica est vere practica. Probatur 2º ex Divo Thoma 1º Poster. lec. 1. ubi ait: ars quaedam necessaria, quae sit directiva ipsius actus rationis, per quam (scilicet) homo in ipso actu rationis ordinate, et faciliter, et sine errore procedat, et haec ars est Logica. Idemque habet S. Doctor 1.2ae Q. 57. A. 3. ubi ait, Logica est ars per quam dirigimur ad actus rationis. Subsumo 1º omnis ars est vere, et formaliter practica; sed Logica est ars: ergo est vere, et formaliter practica. Subsumo 2º sicut ars externa se habet ad opus externum, ita se habet Logica ad opus rationis; sed ars externa respectu sui operis, vere, et formaliter practica est respectu operis externi: ergo et Logica est vere, et formaliter practica respectu operis rationis. Subsumo 3º non minus practica est [illegible] in artibus Liberalibus, quam in Mechanicis; sed haec ex respectu artis est vere, et formaliter practica: ergo ex eodem respectu est vere, et formaliter practica in Liberalibus. Atqui Logica est formaliter ars Liberalis: ergo.

3º. [illegible]

Logica est tota vere practica: Probatur: Logica multiplicem [illegible] speculationem [illegible]: ergo est vere practica. [illegible]: quia [illegible], quibus Logica [illegible] omnium [illegible], sed [illegible] practica: ergo Logica [illegible] lex [illegible]. [illegible] quia [illegible], quibus Logica [illegible] omnium [illegible], vere, et formaliter dirigit [illegible] [illegible]: ergo [illegible] practica. Probatur: quia [illegible], quibus Logica [illegible] omnium [illegible], [illegible] collectionis, quia [illegible] Logica [illegible]: sed

omnes actus conformes ex modo obiecti ordinatos a Deo sunt
mala, cum proprie dicantur talis ad modum rationis, hinc est: Et
omnes actus, quibus homo [illegible]. non [illegible] ca
so: sunt autem ex eo, quod sunt omnes [illegible] lege
et [illegible] actus, vel [illegible] dicuntur talis ad modum
rationis, vel ad [illegible], vel ad [illegible] sine [illegible]
[illegible] quae in [illegible], [illegible] talis
ad modum rationis [illegible] ad [illegible] ordinatos [illegible]
[illegible]; atque adeo [illegible] Legem non [illegible] dicitur est.

350. [illegible]
[illegible] actus Legi [illegible] vel ad legem [illegible],
vel ad [illegible], proprie talis: Et [illegible] actus Legi esse
non ex proprie dicuntur ad modum rationis [illegible]: [illegible]
[illegible] actus Legi esse speciem [illegible]; [illegible]
[illegible] Legem docet (hoc est [illegible]) est [illegible]
[illegible], sed [illegible] talis ad [illegible]
[illegible] rationis, [illegible] dicuntur; non [illegible]:
[illegible]: Legem [illegible] proprie talem (id est, quae simul est docet) [illegible]
[illegible] dicuntur, [illegible] modo [illegible] ad modum
[illegible] rationis [illegible]. [illegible], ex [illegible], [illegible]
[illegible] ex [illegible], cum Legem [illegible] speciem
[illegible]: Et [illegible] actus proprie Legi est dicuntur ad
modum rationis [illegible]: [illegible] ad [illegible] Legis [illegible]
[illegible] proprie [illegible].

351. [illegible] speciem
[illegible] Legem, [illegible], dicitur est modus rationis [illegible]
[illegible]; dicitur est modus rationis [illegible], [illegible]
[illegible] speciem: Et Legem [illegible] speciem: [illegible]
[illegible] Deo [illegible]. [illegible] est [illegible]
[illegible] docet. [illegible]: [illegible], dicitur est Legem proprie

contra actus diversi ad distinctos est formalis legis. Altera vero sic: ille actus dicitur &c. est legis dispositio talis ponentis contrarium facere, quo modo a Deo prohibitum est. atqui actus diversi ad distinctos dispositum, quo modo prohibita est a Deo, formaliter peccatum est atque adeo non est peccatum: ergo actus diversi accidit peccati non sunt.

353. R. Respondeo concedendo, legis observatio esse peccatum, quatenus actus disponit alios actus peccatorum aliorum peccatorum. Et primo, Deo est modus consequendi &c.; 2o contrarium alicuius relucet directe, et directe alteri. Et, cui contrarium est valde contrarium sequitur: nego, velle actus, contrarium alteri relucet &c. est dispositio formalis legis, velut quod in hac ratione actus formaliter legis ipsum, exigit libere alterius modo consequendi extra rationem legis ratione ipsius non est legis. Si tamen: ergo non est peccatum; nego ratione legis Deo, ex quolibet alterius consequendi modo facto contra legem est nulla lex. Haec propositio ratio citato Tractatu, D. L. S. R. Sub. S. L.

354. Respondebis exsperimento quodam sic: ex dispositione contra legem non bene sequitur omnes leges actus esse distinctos: ergo ad ipsius non bene, nominare peccata divisim; ita omnibus collective; atqui quolibet actus legis dicit totam legem, ut cuilibet bene conveniat depositio totius legis; ergo sicut omnes actus legis bene sunt praecepti, ita omnes boni sunt inseparabiles; nec sequitur absurdum: ergo contra: per dispositionem cuiuslibet potentiae ex parte sui singulis omnibus actus, qui ad ipsum spectant, et modo, quo actus singulis singulare bene est: ergo sicut non spectat ad potentiam, actus ergo in non videtur circa sui singulis formalis potentiae; ita nec spectat actus, qui singulis sunt non respondet modo per dispositionem ex parte alio. Id sane ex parte per dispositionem legis est modus consequendi, ex modo consequendi, est distinctum: ergo est, sicut non est actus formalis legis, si non videtur circa modus consequendi; ita nec est formaliter quantitas et ma-

modus necessarii directus.

356. [illegible] actus, qui [illegible] specificam [illegible] rationale, non est [illegible] ideoque [illegible] ex hac propositione, *omnis appellatio [illegible] rationalis*: [illegible] actus, qui [illegible] directe [illegible] modus necessarii [illegible] [illegible] non [illegible] explicatione [illegible] [illegible] directa [illegible] modus necessarii, quae [illegible] [illegible] specifica actus [illegible] rationale. [illegible], [illegible] [illegible] iuxta [illegible], [illegible] Deus [illegible] a Paulo, [illegible] a nouo, [illegible] Antonius a [illegible] [illegible].

ratio A præcise metaphysice distinguitur a ratione B. quod ex Petro præcise
[illegible] a Paulo distinguitur: quod de qui potest: ergo si ratio A præcise
non ipsa non distinguetur a ratione B, distinguetur per superadditam
rationem, [illegible] [illegible] [illegible]: [illegible] [illegible] superadditam
rationem per aliam superadditam [illegible] distingui; [illegible] per aliam, [illegible]
[illegible]. [illegible] [illegible] a paritate.

13. Sed [illegible] paritatem reddere conceptum
A [illegible]: [illegible], rationem, præcise ipsi [illegible] distingui, [illegible]
ratione formaliter distinguendi; sicut unio præcise ipsa sine alia unione
unitur extremis: [illegible]: quod ratio A sit ratio formalis distinguendi
Petrum a Paulo, [illegible], quod ratio A sine nova ratione,
sit distinctio sui a Petro, et Paulo: sicut [illegible] unio [illegible]
et anima sit ratio formalis uniendi [illegible], et animam, [illegible],
unionem præcise ipsam, unione [illegible] animæ; [illegible] Petri [illegible] A[illegible]
[illegible] [illegible] paritatem [illegible], quod sic [illegible]: [illegible]
unio [illegible], et anima sit ratio formalis uniendi [illegible]
a, [illegible] nova unione, et simul [illegible] [illegible] unionem
[illegible] [illegible] [illegible]: [illegible] quando ratio A sit ratio
formalis distinguendi Petrum a Paulo, [illegible] ipsa [illegible] ratione
B [illegible], superaddita ratione [illegible], [illegible], [illegible]
[illegible] [illegible], [illegible] [illegible] rationem formalem distinguendi Petrum a Pau
lo, [illegible] rationem formalem distinguendi præcise a ratione B. [illegible]
[illegible] [illegible] [illegible] paritatem [illegible], [illegible]: [illegible]
[illegible] ratio A est ratio formalis distinguendi præcise a ratione B.
ergo ratio A [illegible] [illegible] [illegible], [illegible], [illegible] B;
[illegible] Petrus præcise ipse [illegible] [illegible], [illegible]
[illegible] Pauli: [illegible] Petrus est ratio formalis distinguendi præcise a Pau
lo: [illegible] [illegible].

14. [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]
[illegible] [illegible] rationem: [illegible]. [illegible] certum est, [illegible] [illegible]

natura Petri nominibus, quibus vel omnino provenit, subjecta est;
quod ex dictis supra satis constat in praesenti: id, per quod Petrus
non est sufficiens *sibi numero distinctus*, neque sufficiens est distinctio
alii Petri ab omni alio a se; sed Petrus per naturam Petri non est
sufficiens *sibi numero distinctus*: ergo natura Petri neque sufficiens
est distinctio realis Petri ab omni alio a se: ergo etc. Confirmatur
enim: quia alias Petrus sufficeret universaliter per naturam Petri distingui a
natura, a qua distinguitur adaequate. Confirmatur ergo ex dictis supra
etc.: nam id, per quod Petrus est *sibi numero distinctus*, est distinctio ipsa
aliis, et numerica; *distinctio autem individualis, et numerica sibi ponit,*
et distinctio realis sibi ponit ab omni alio a se, idest omnino, ergo
15. Praeterea

natura specifica, quae non distinguitur specifice, ab eo quo distinguitur,
non per aliquid adaequate distinguitur ab eo, a quo specifice distinguitur
non distinguitur: ergo distinctio numerica, qua Petrus distinguitur numerice
a Paulo, vel Petrus, non per aliquid distinguitur adaequate
a Deo, per quod numerice distinguitur a Paulo. atqui natura
Petri adaequate distinguitur a Deo: ergo per ipsam naturam Petrus a
Paulo numerice distinguitur. id Petrus distinguitur numerice a Paulo et
Paulo numerice distinguitur conditione, non ab ipso distinguitur: ergo.
16. Dices: denominationem *distinctionis*

per se convenire sufficienter a forma intrinseca, qualis est distinctio numerica,
et sufficienter etiam a forma extrinseca, qualis est natura Petri
competenti. natura exhibet multiplici exemplo: sic natura de-
nominatur *caeca* per visionem, quae in se est denominatur per se
ipsam *caeca*. sic per humanitatem Christi Domini denom-
inatur *sancta* per Gratiam naturalem, quae in se per sanctitatem sine
sancta subjectum. sic, iuxta probabilem opinionem, Angelus, qui
nominatur *Beatus* per amorem, qui in se primo subjecto Beatus
est. an ergo natura Petri idem in denominatione Petrus

dicitur [illegible] a Paulo, [illegible] ad [illegible] [illegible] dicitur.

11. Sed [illegible]: non [illegible] [illegible] posse, [illegible] nomine [illegible] [illegible] sufficienter a [illegible], [illegible] [illegible] [illegible] idonea, et sufficienter a [illegible] [illegible], [illegible] Physica idonei ad [illegible] dicitur. [illegible] Adami, [illegible] ad [illegible] exempla [illegible], ex [illegible] operationes [illegible]. [illegible] [illegible], [illegible], et Paulus [illegible] ad [illegible]. [illegible] [illegible] Physica [illegible] sufficienter [illegible] a Paulo: [illegible] &c. [illegible] [illegible] sufficienter [illegible]: [illegible] &c. [illegible] [illegible] sufficienter, [illegible] Deus [illegible] [illegible], [illegible] [illegible] Deus [illegible]

dine [illegible] ad opposita. unde probari potest, neque Deus (si ista omittatur) [illegible] Dei esse per sufficientiam, quod ea [illegible] mortalis denominatio. Ergo, Deus sufficiens denominatur unus, et unitas in toto [illegible], idemque in ratione [illegible] alterius Dei, si [illegible] omittatur. [illegible] hypothesim, [illegible] nostra [illegible].

20. Dices contra hypothesim, [illegible] secundo [illegible] [illegible] non esse sufficiens [illegible] ex [illegible]. [illegible] extremo [illegible] idest; atque [illegible], quo [illegible], et Paulus [illegible] de [illegible] ad idem, [illegible] nostri [illegible], ad hoc idem [illegible]: [illegible] non [illegible]: quo extremo [illegible] ad idem [illegible] [illegible]; [illegible] [illegible] idem, [illegible] idest. Dices: extremo [illegible] ~~[illegible]~~ [illegible] [illegible] Dei: id [illegible] de [illegible] extremo de [illegible] ad id [illegible], [illegible] est, [illegible]: [illegible] [illegible] [illegible] hypothesi [illegible]. [illegible] 2°. [illegible] [illegible] non [illegible], de qua [illegible] hypothesi [illegible]. Deus et Paulus [illegible] ad idem: [illegible] non; [illegible] omittitur; [illegible] sufficit extremo ad idem [illegible]: [illegible] non [illegible] sufficiens ad [illegible] extremo [illegible] ad idem, [illegible] non [illegible] sufficiens ad extremo idem [illegible], [illegible] &c.

58. [illegible]

minat respectivus obiecti illud, quod per ipsum denominatur obiectum; ita quod idem utrinque esse ab eodem actu respectivo terminari, et respective denominari; et quia, cum illud amor intrinsece, et tantum respectivi terminat obiectum, et ipsum sequitur, ut obiectum denominet respectivum; quia, ut denominet completum, sicut amor extrinsece, quod ipso tendat ad obiectum, hoc denominat ipsum; ita per hoc positive, quod respective tendat ad obiectum, illud denominat respectivum. At ut amor denominet obiectum amatum, et ut odium denominet obiectum odio habitum, nec obiectum requiritur, quod tendat, sed quod eodem modo tendat ad obiectum. Ad 2um dico: cum obiectum amoris actu est ipsum, est respectivum; at actu ipsum non est amor, cum obiectum ipsius est odium; nec est odium cum obiectum amoris est amor.

59. Item 2o. de lo amore amicitiae est Dei, et de lo odio inimicitiae non est Dei, quia de amore, et odio non idem inimicitiae contradictoria. Probatur: contradictoria oriuntur ex affirmatione, et negatione de eodem aliquid ita obiicitur, quod una affirmat, et neget de eodem aliquid illud: sed contradictoria sunt hae propositiones, aliquis equus est rationalis, aliquis equus non est rationalis; atque item, aliquis equus est Dei, aliquis equus non est Dei: ergo ita contradictoria sunt amoris amor, et odium, ut amor est Dei, contradictio odium amicitiae Dei: ergo.

60. quod non cognoscit divina, et distinctione nominum considerari ad ipsa perfectionem, et tale, ideo speciem accipit, non
quae est dicere: primo cognoscit alia, nec divina, nec distinctione
nominum cognoscit, nec cognoscibili est prius non ex se. Ergo,
divina nomina, ab omni alio non nata, distinctione nominum
ab omni non ipso, et cognoscit specificationem suprema,
sive divina, sive distinctione, cognoscendi modo, quo cognoscit
esse alia.

115. Igitur non cognoscitur cognoscere alia, quod sive est
obstat, ut si non esset, aliquam nova cognoscere, id nomina
cognoscere alia, sed est in obiecto esse vale, ac non esset.
Quod. Et nunc dico se non accipit cognoscere
esse alia, vale, vel vale sed non deminuendi, alia
pars: quod prius speciem cognoscit alia, et non vale. 2o: prius cognoscit
quod alia, necessario cognoscere alia, vel ex vale, et non necessario
vale, ex vale: quod aliquo quia non cognoscit alia, quo
non cognoscit vale. Ergo duo discurrendo non. Non cognoscitur
nec complane, ex vale prius cognoscit alia, quod sive esse ideo
non cognoscit specificationem accipit esse nominum. Respondeo:
alterum non nomina cognoscere alia, tamen non est continue alia,
et non est continue vale: non est tamen non per cognoscere prius
cognoscere alia, omnino prius non explicatur. Quomodo quia
nunc quam praecedit in distincti in cognoscere quod cognoscit
alia. Sicut quia introducunt esse distinctione, quod alia
non cognoscit nova alia sive est in obiecto esse vale, aut
non esset: sed non solum quod cognoscit vale, ac vale, quo
similiter nec cognoscit alia; et non cognoscit vale
specificationem accipit eo modo, quo cognoscit alia. Tamen
et itaque mihi clara explicatio, et loco. Vel huiusmodi
mi dicendo: quod esse vale subordinari parti vale.

obiectum quidditativum cognoscit abstractive de plena
vel non plena in aliqua ratione superiori:
per cognitionem abstractivam et intuitivam sit vera
plena vel non plena in aliqua ratione: quod probatur
quando cognoscit in aliquo particulari plena vel
non plena: quia in aliquo genere plena, vel
non plena, aliquo genere plena vel plena: et sic
de eius similitudine particulari vel particulari non plena
ratione: in aliquo genere plena, vel plena per
ipsius cognitionem plena vel non plena in utraque causa
vel virtute. Quod probatur: eo modo, quo
cognoscitur plena vel non plena cognoscitur plena,
vel plena: id quod abstractive cognoscit
habet per obiectum quidditativum plenum, vel plenum,
etc. Et. contra dicit D. Thomas C.
et dicit: unde est unum in cognitione: quia
habet plenum, vel plenum in utraque unum quid-
ditatem, et plenum quid ad non plena in utraque unum
quidditatem, sed per ipsum plenum, vel plenum in
omni genere per quidditatem ad cognitionem abstractivam,
non ratione plena vel non plena: plena vel pl-
ena non sit ratio plena vel non plena, sed
plena vel non plena sit ratio plena vel
plena: aliud est plena, vel non plena, quae
est unum quidditatem; aliud quod plena quod quid
non, quae est unum quidditatem: plena vel
non plena sit plena vel plena, et sic non po-
test de obiecto quidditativo abstractive; plena quod
non sit plena per particularia virtualiter
cognita. Et sic sit obiectum quidditativum cognitum.
